Re: RonCon Properties, Inc.
(your letter dated August 7, 1990)

Attention: Mr. Kim Leany

Dear Mr. Leany:

I recieved your letter dated August 7, 1990, in which you have made many requests, some of which you and I have thoroughly discussed in great length and detail, notably your insistant request for a time frame with regards to the previous cuts and pads left readily accessable and well exposed for RonCon's benefit, by Freeport McMoran, which I feel is most important to us for substantiating a mineral discovery and for further development.

You have in your files and possession a letter of obligation for future reclamation that was accepted by your agent at the time, and I feel should be honored by B.L.M. Hopefully this will quell any further demands for this particular area of our legitimate claim structure at this time.

With respect to another segmant of paragraph two, RonCon Properties, Inc., has maintained portions of pre-existing access roads, which is of importance to us for accessability.

Also in your files and possession are maps prepared by Freeport McMoran precisely indicating cuts, drill pads, together with an area of reclamation performed by them on our behalf, leaving one area of reclamation for us at a latter date as outlined in my second paragraph of this letter.

Your request to advise you withing 15 days of the date of your letter pertaining to our two new dozer cuts, I feel is premature, we fully intend and are in the process of doing considerable study of and numerous analytical samplying, together with the mapping structeurally, (Geologically) the newly exposed areas of interest to us. A time frame at this early date is impractible.

Being as you do in fact have in your files and possession complete mapping of previous activity performed by Freeport McMoran Gold Co., while under our lease agreement with them, and a Topographic map of our two new dozer

cuts, together with the maintenance of a portion of pre-existing access roads, I must feel we have already complied with most all your requests.

I wish to make note that I feel we are being singled out and scrutinized and somewhat harrassed for our past and current activities of which we are legatimate and heavily invested. It is our intentions to bring our properties to an eventual producing mine. Perhaps attentions should be directed to others in the region that have no directives or intentions to ultimately bring on line a mine of the magnitude we are working towards.

Sincerely,

Ronald Terry President

RGT/jt
